Here are some of the most commonly used Laravel commands:

1. **Controller Creation:** `php artisan make:controller ArticleController`
2. **Eloquent Model Creation:** `php artisan make:model Article`
3. **Front-end Scaffolding:**
 - For Bootstrap: `php artisan ui bootstrap`
 - For Vue: `php artisan ui vue`
 - For React: `php artisan ui react`
4. **Authentication Configuration:** `php artisan ui vue --auth`
5. **Migration Creation:** `php artisan make:migration create_articles_table`
6. **Database Migration:** `php artisan migrate`
7. **Route Listing:** `php artisan route:list`
8. **Starting Tinker:** `php artisan tinker`
9. **Starting Development Server:** `php artisan serve`
10. **Maintenance Mode:**
 - In Maintenance: `php artisan down`
 - Out of Maintenance: `php artisan up`
11. **Listing Commands:** `php artisan list`

Remember, to know more about any command, you can use `-h` or `--help` at the end of the command...
